7 CALLS.

ONE CONTAINER.

STILL ON HOLD.

The updates are in.
The details don't line up.

The follow-through lands on you.

A REALTIME TECH

The supplier says ready. The paperwork says otherwise.

The latest packing list doesn't match the booking.

ART checks shipment details across the available records and conversations—and follows up on the mismatch.

Fix the document.
Check what else changed.

The revised load may affect vehicle capacity, pickup arrangements and shipping instructions.

ART checks the affected dependencies and coordinates the required updates.

Truck confirmed for **4 PM.**

Loading closes at **3 PM.**

Two confirmations. One plan that cannot work.

ART checks the timings together and seeks a workable arrangement before dispatch.

Now there's a decision.
Not another status call.

Keep the cutoff with a costlier pickup—
or take the later departure?

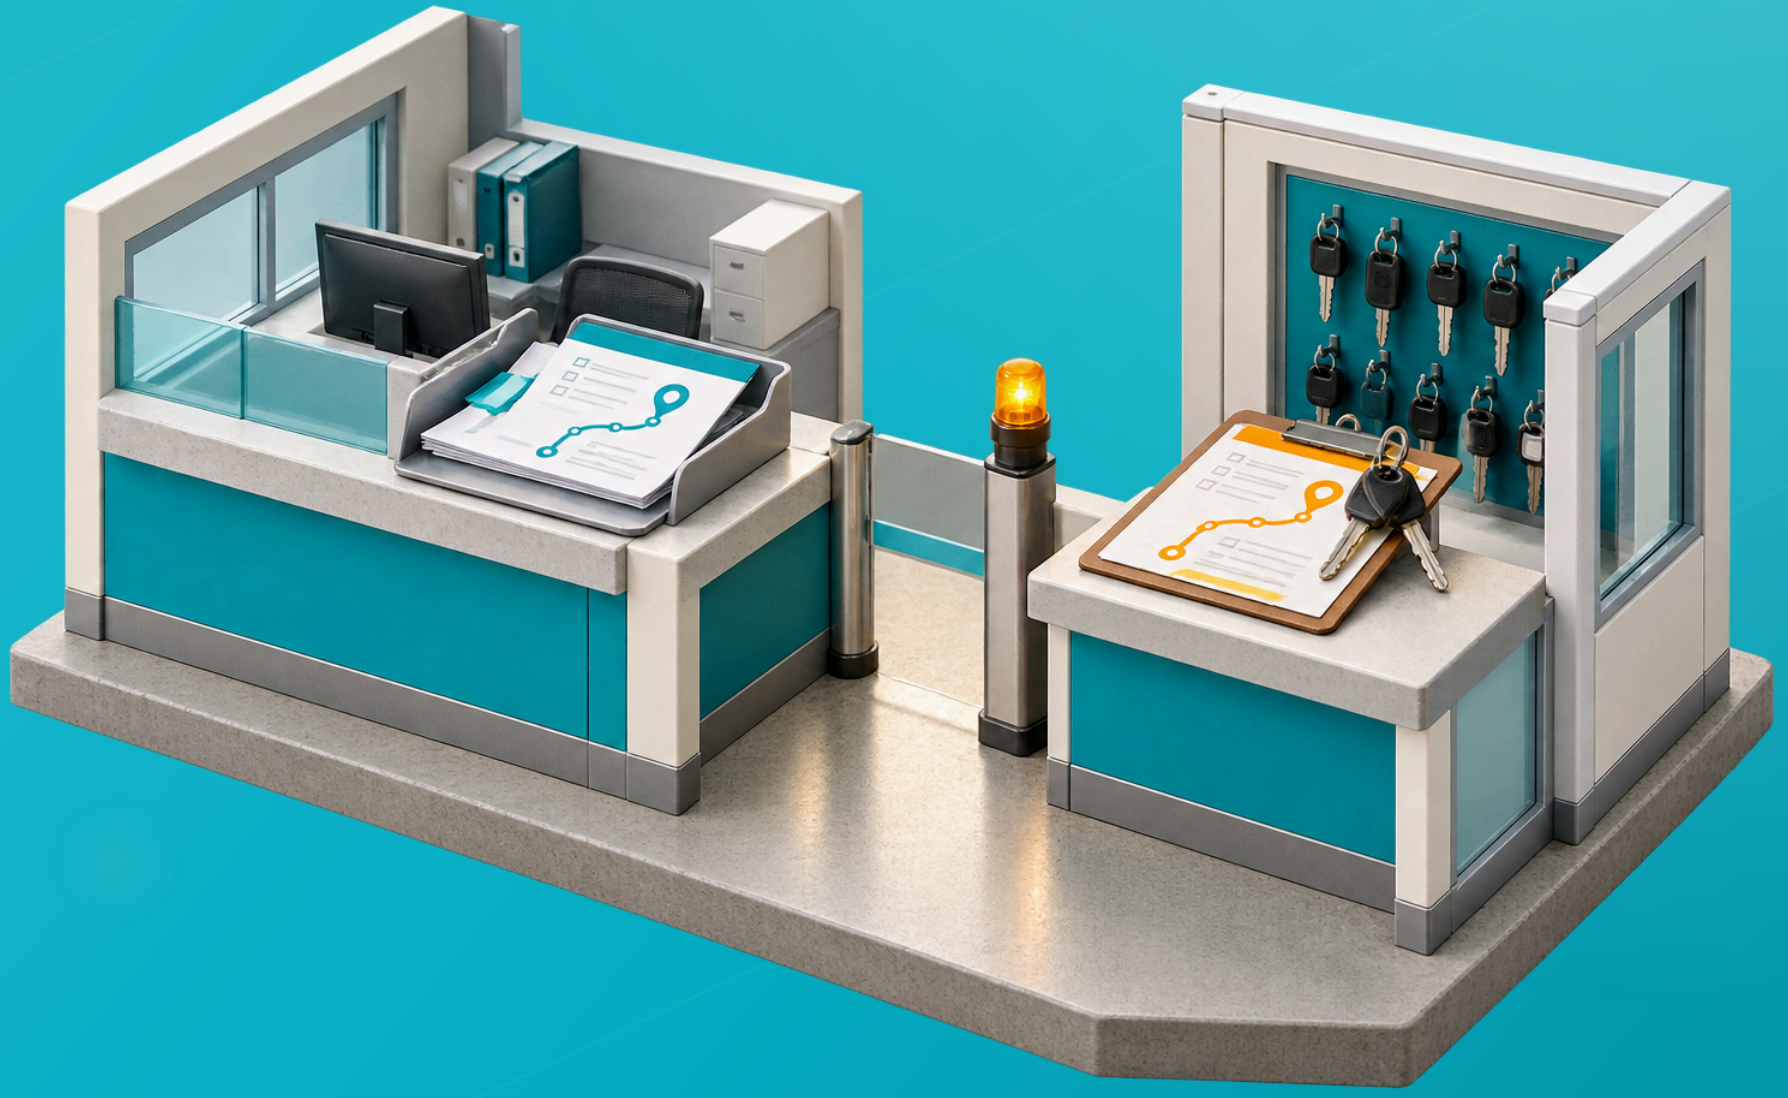

ART gathers the available options, cost and timing impact. Decisions outside your rules reach the right person with context.

New plan sent.
Old plan still in use.

A revised pickup means little if the transporter hasn't confirmed it.

ART follows the handoff through to acknowledgment and action, keeping the unresolved step open.

A REALTIME TECH

Move the container.
Get your day back.

ART checks the details, coordinates the changes and follows through on the handoffs.

DM "CONTAINER"

to explore your shipment workflow.
