Supplier said Tuesday.
It's Friday.
ART's on it.

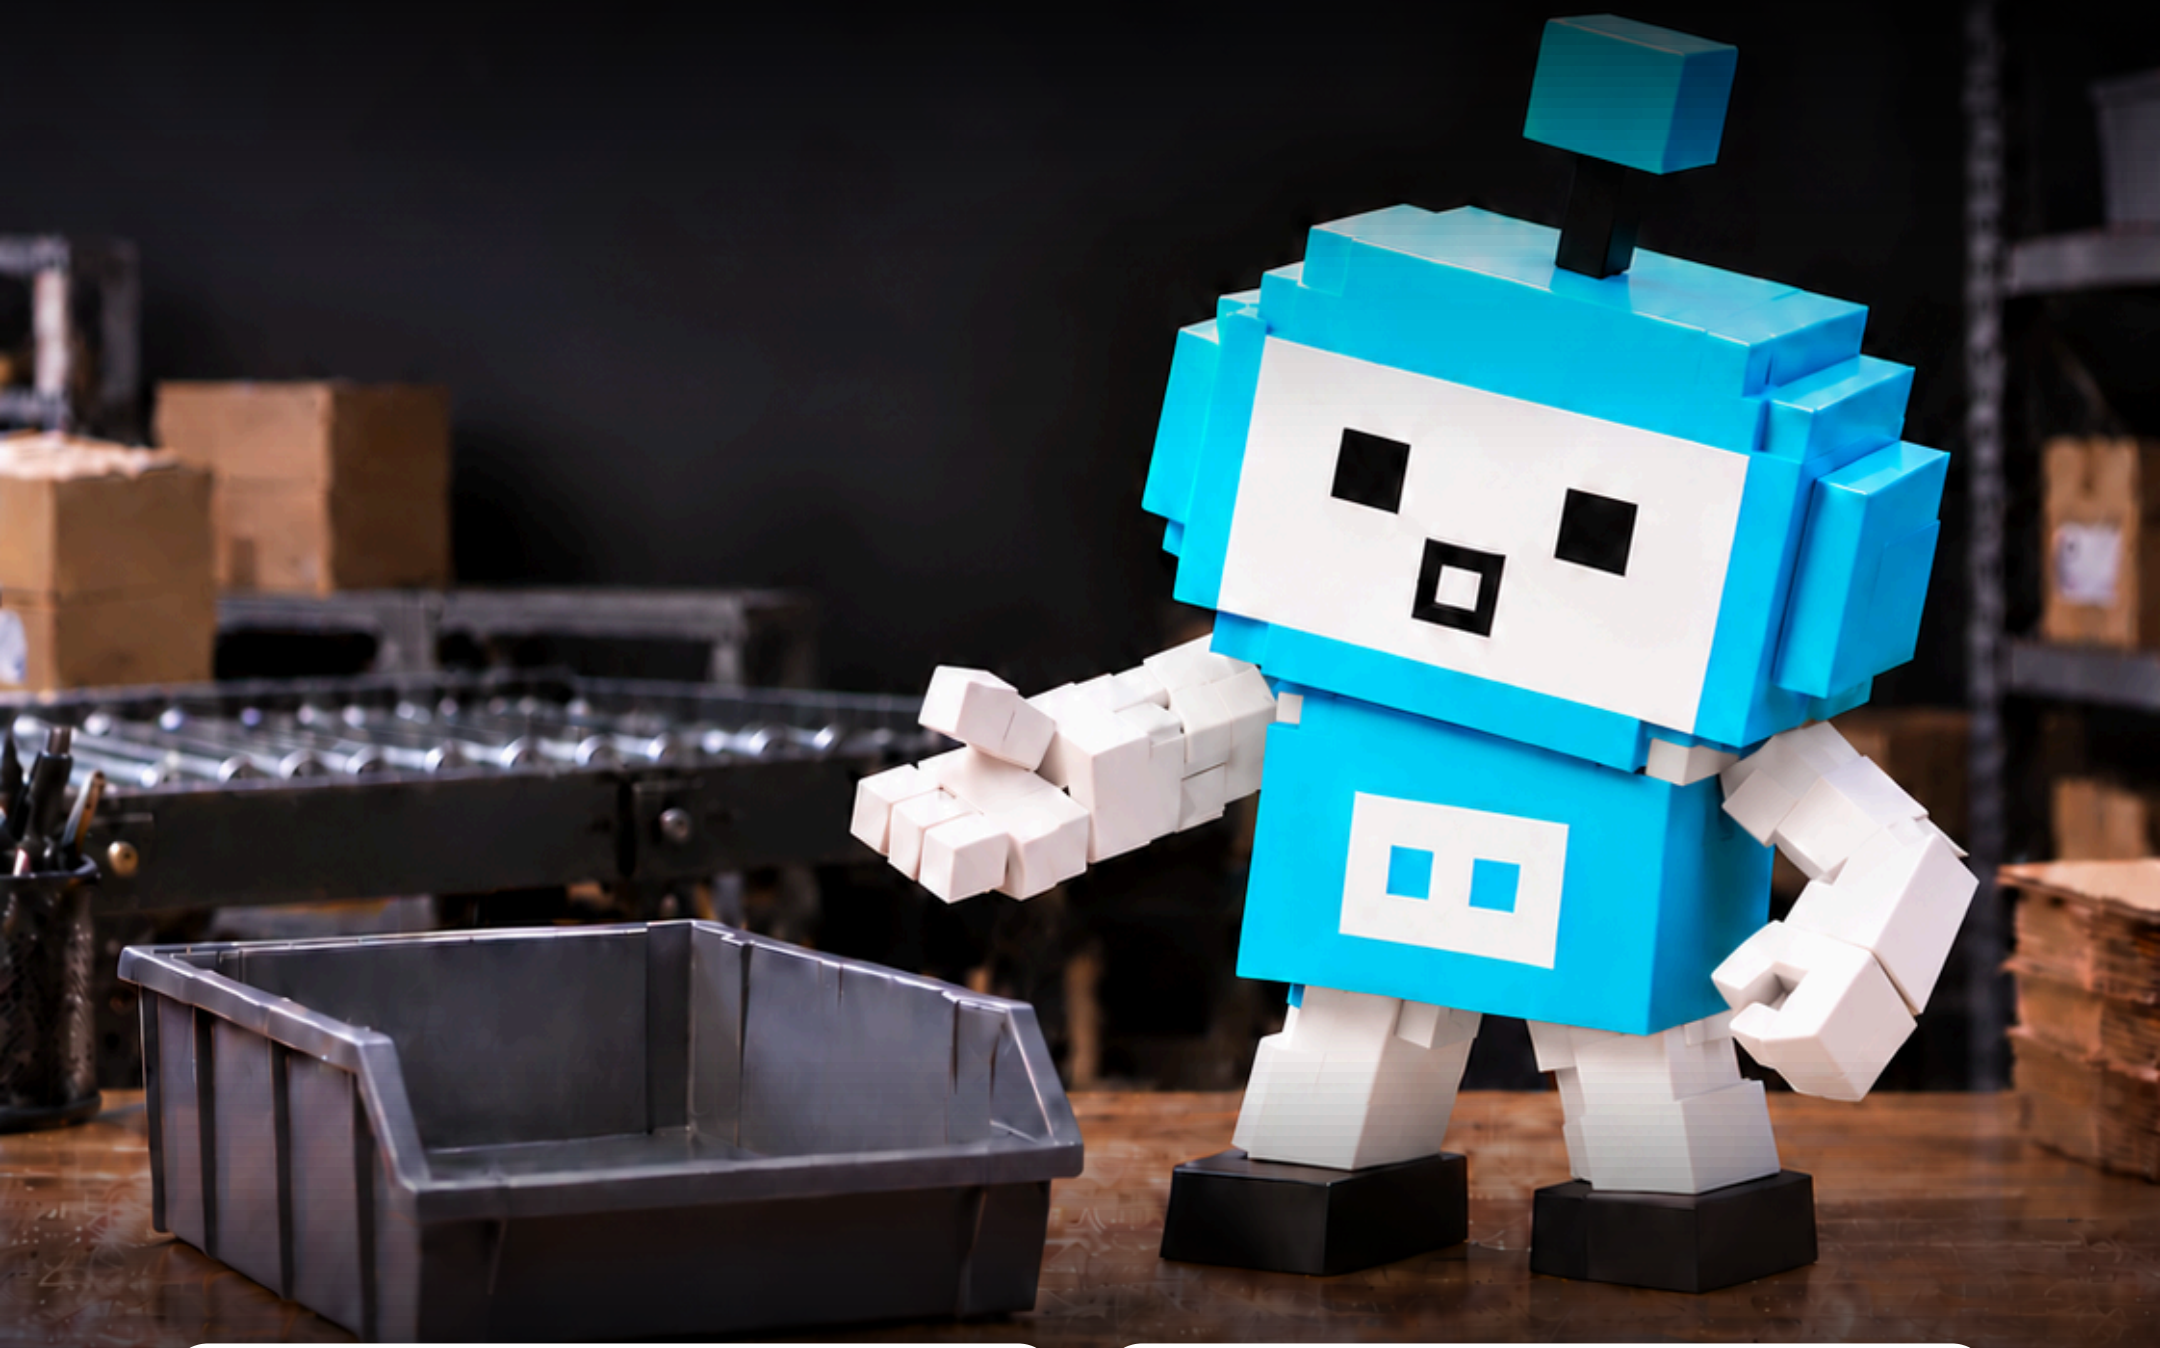

ART (A Realtime Tech) follows up on overdue deliveries.

See what happens next.

One late delivery.
A whole team waiting.

Hours meant for packing turn into
calls, reminders and "any updates?"

- Materials are still missing.
- The packing line is on hold.

ART checks first.
Then follows up.

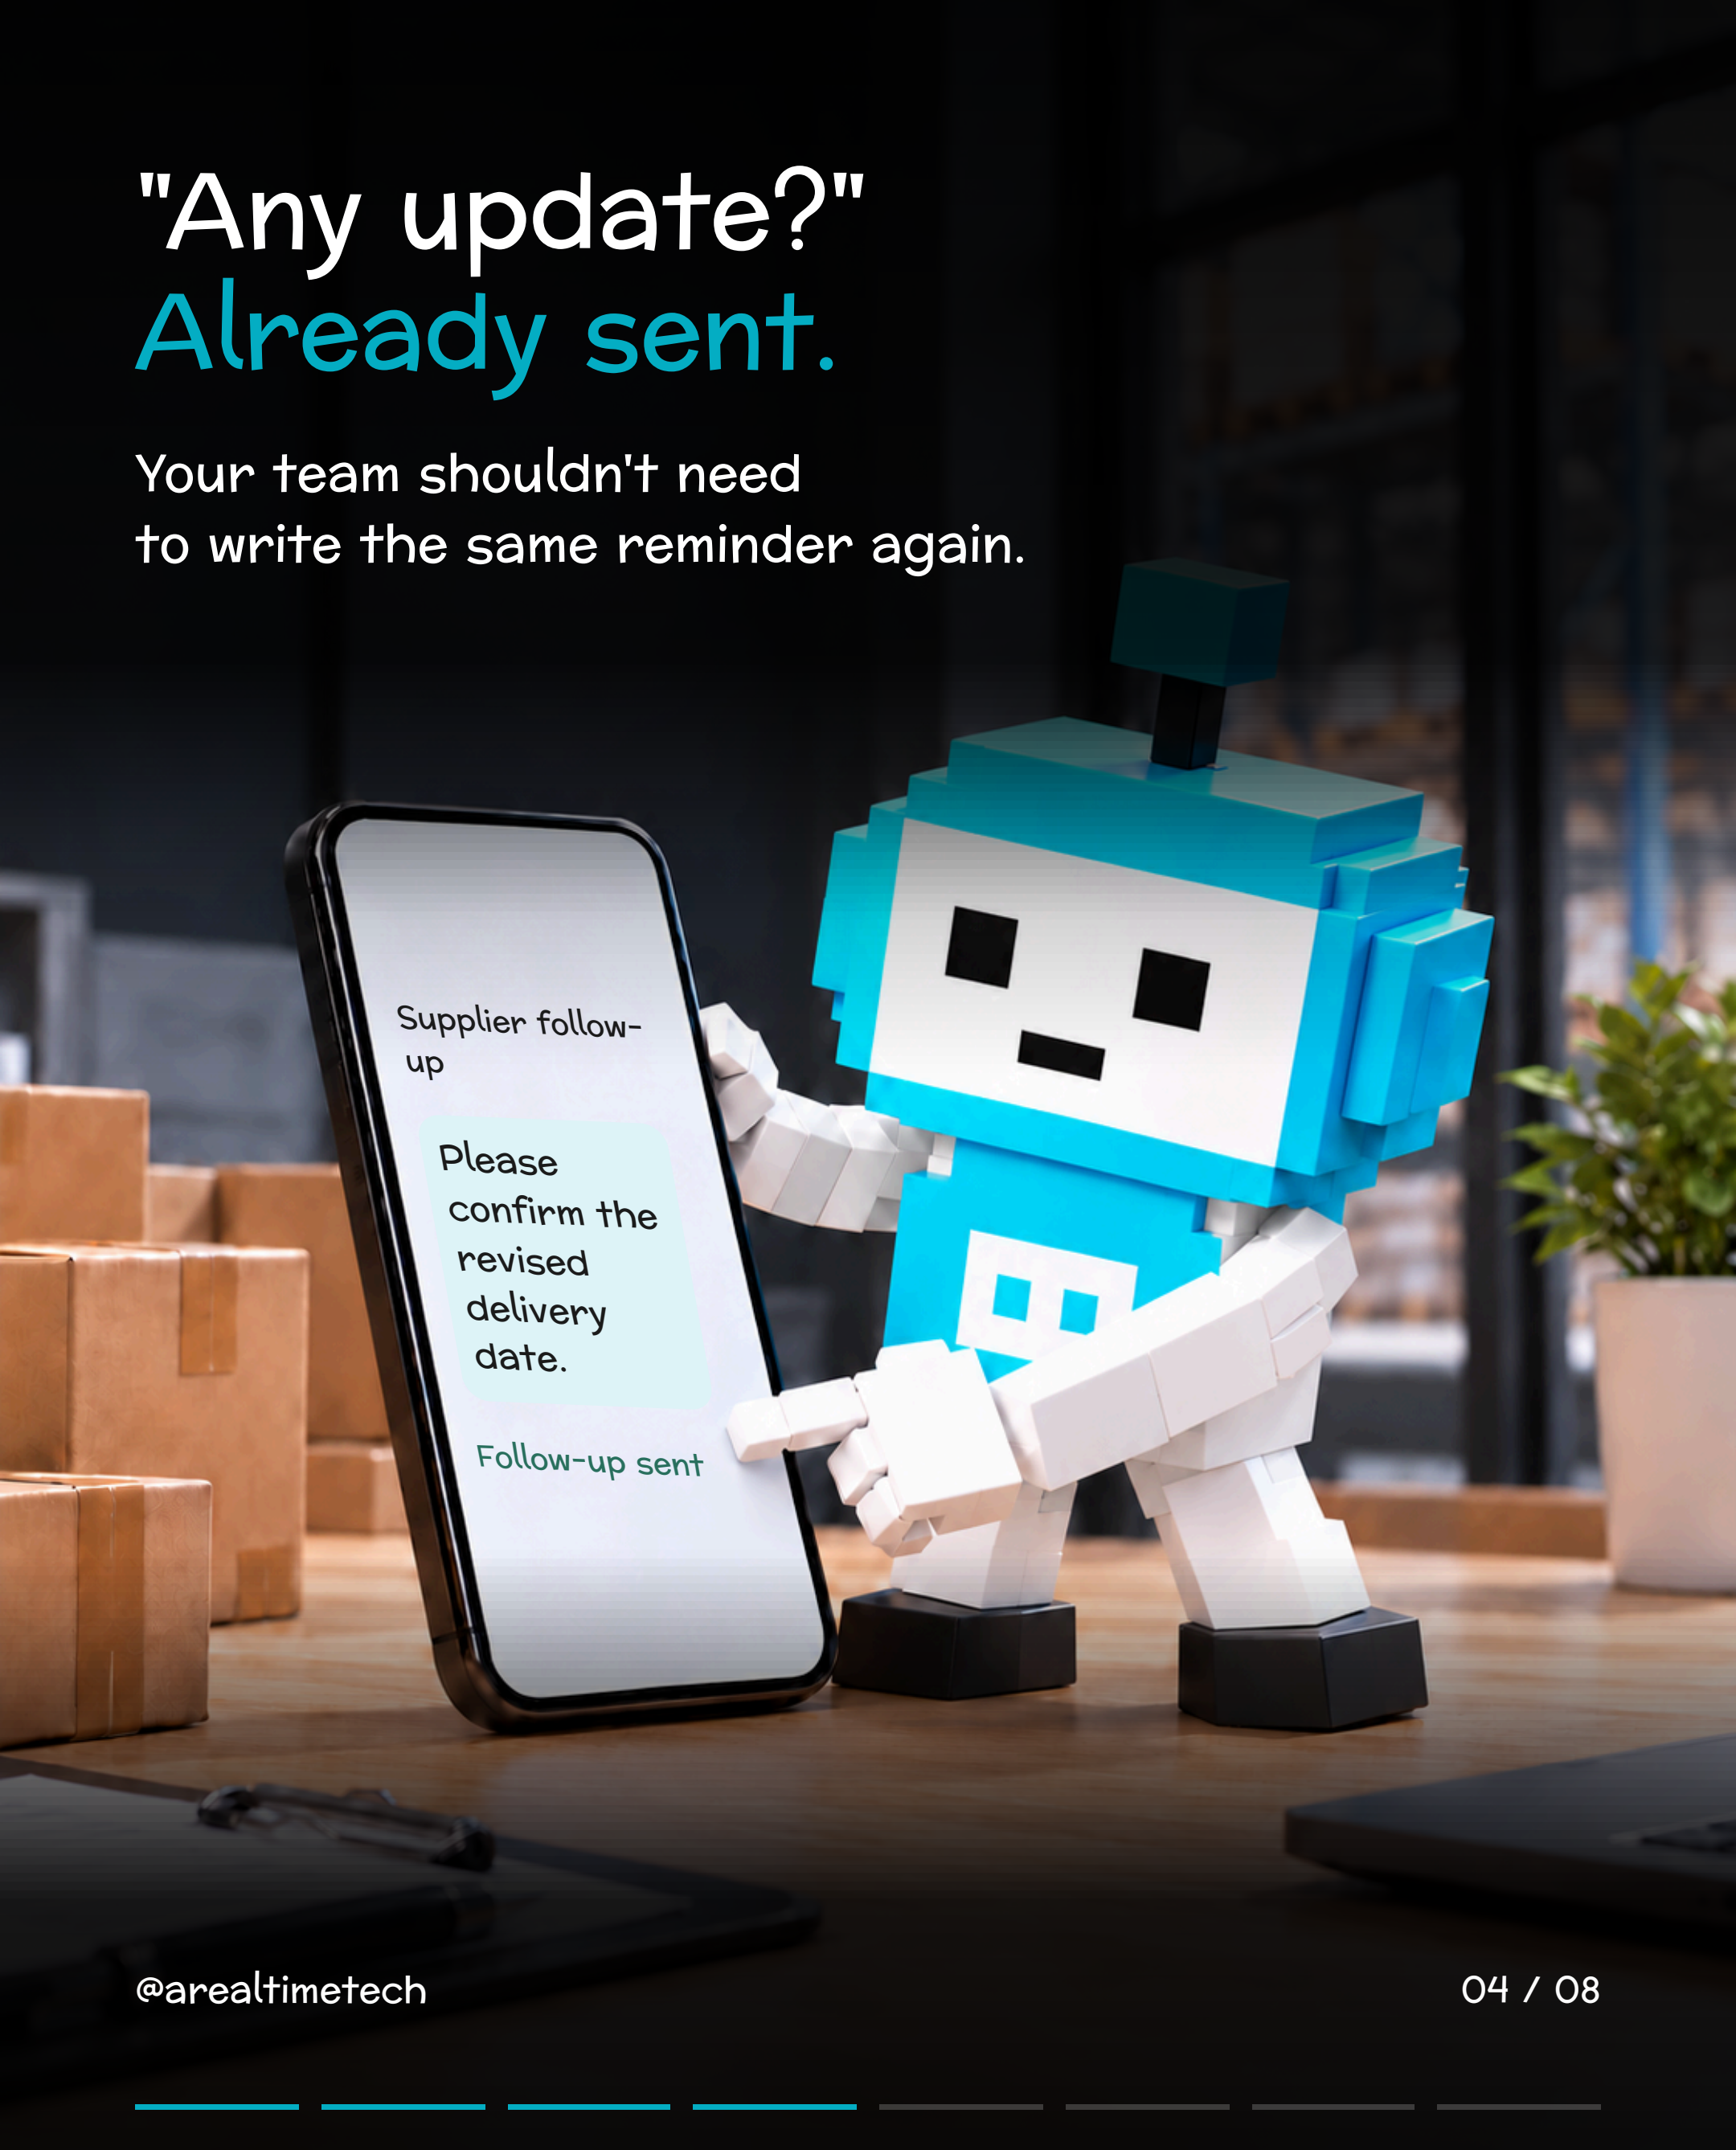

It compares the promised delivery date
with your receiving record.

- The due date has passed.
- The shipment is still missing.

"Any update?"
Already sent.

Your team shouldn't need
to write the same reminder again.

A supplier reply.
A clearer picture.

When the supplier responds,
ART keeps the update with the order.

- Revised date, if provided.
- Latest delivery status.

Silence shouldn't hide the hold-up.

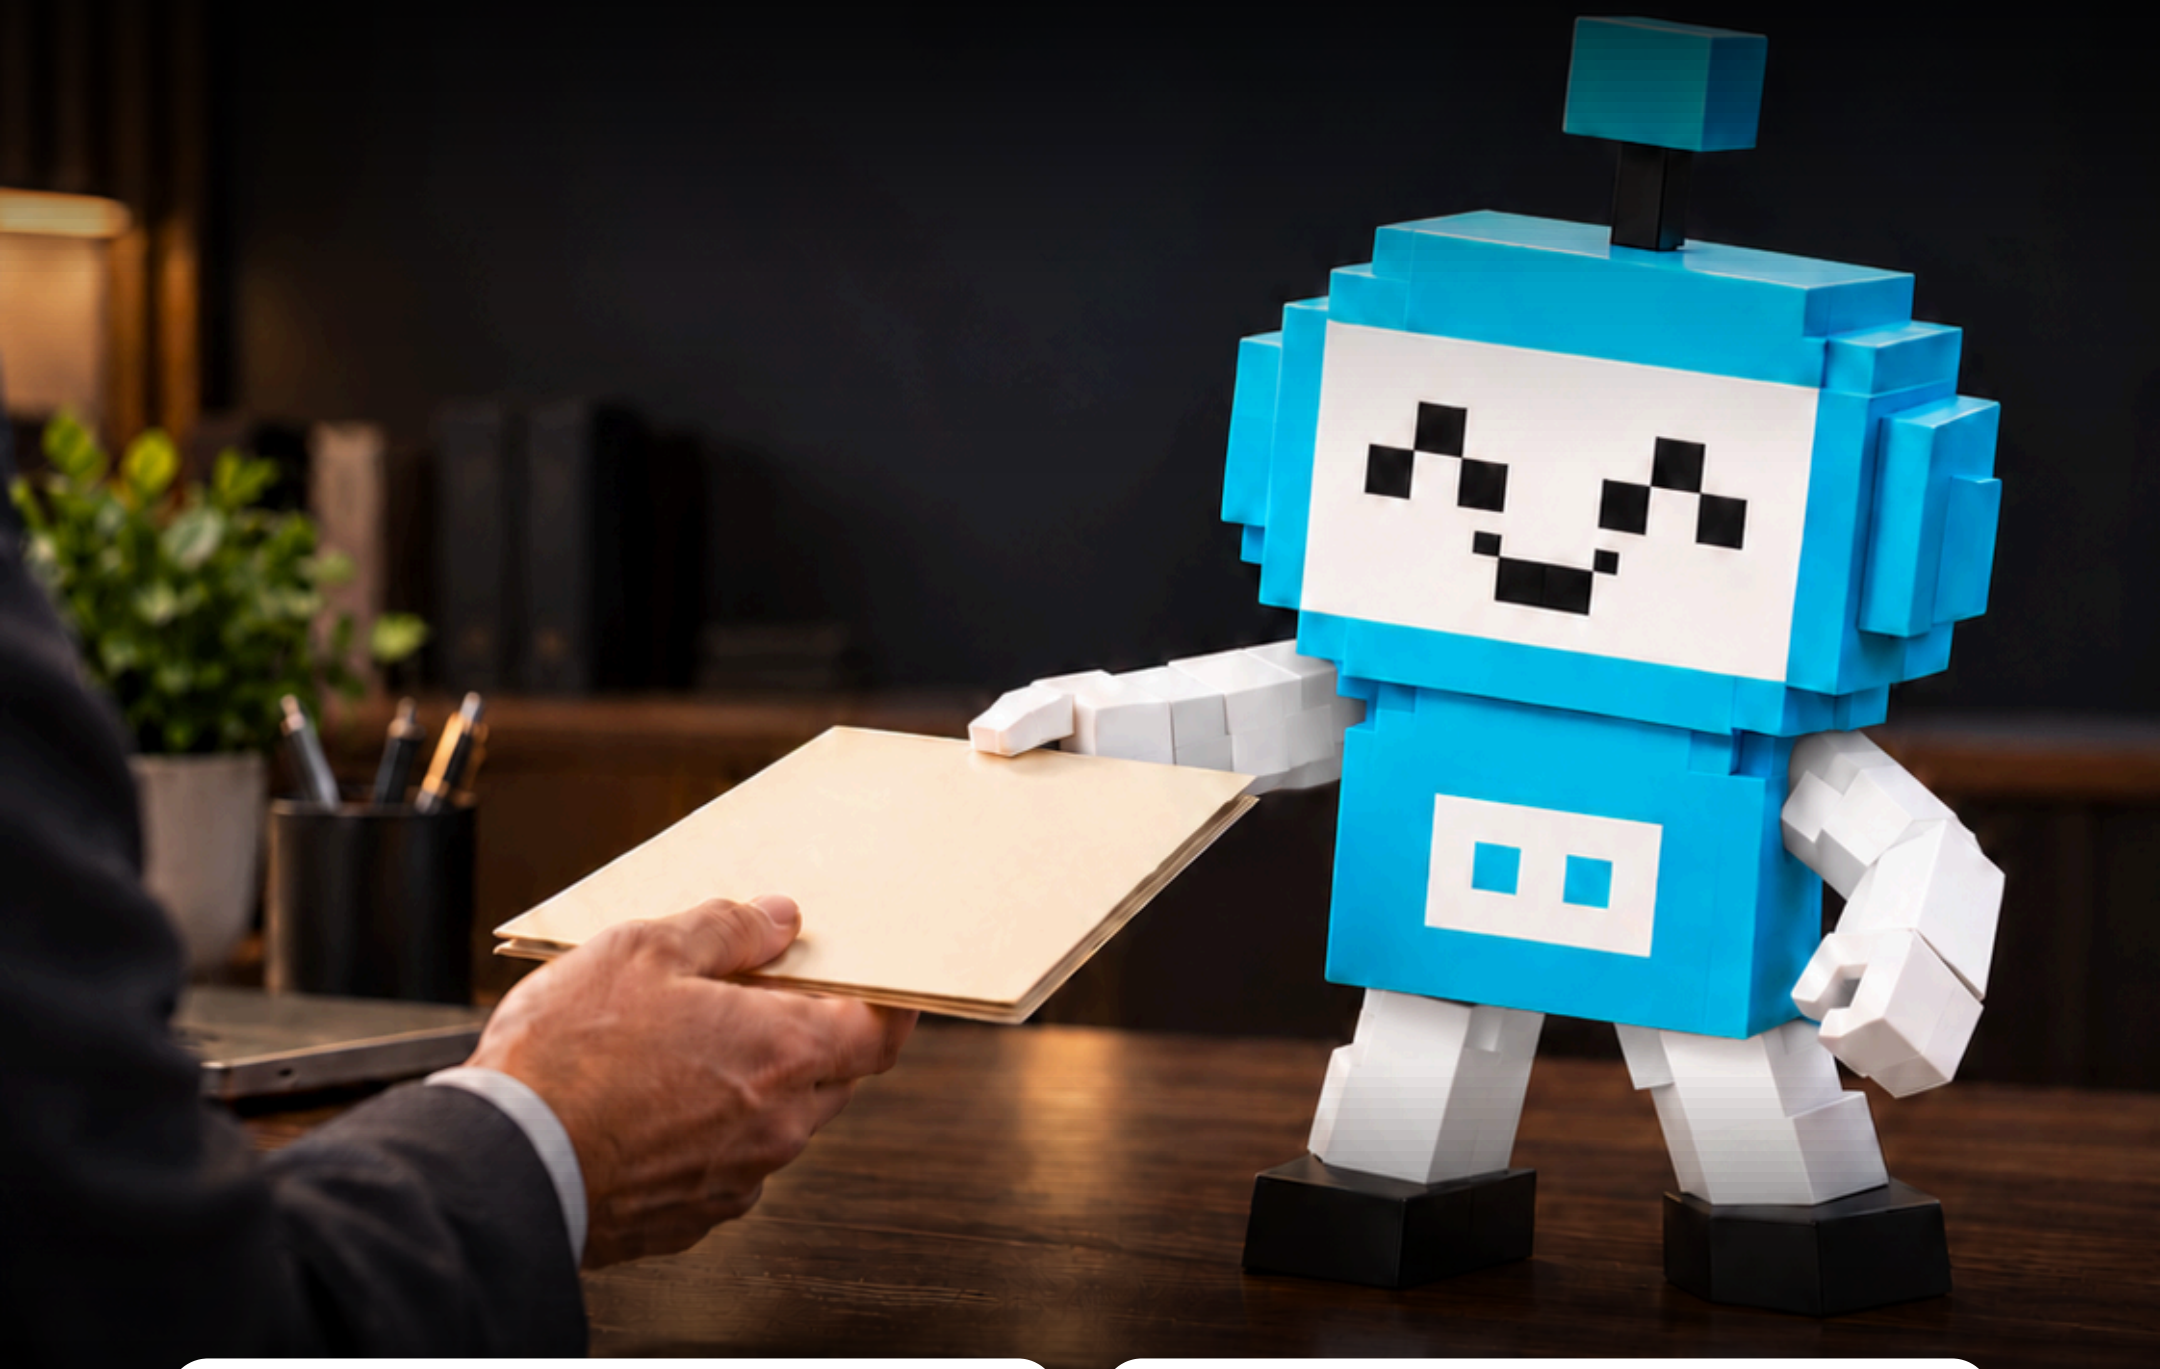

If the supplier stays silent,
ART alerts your team.

- See the overdue delivery.
- See the work it is holding up.

ART brings the facts.
You make the call.

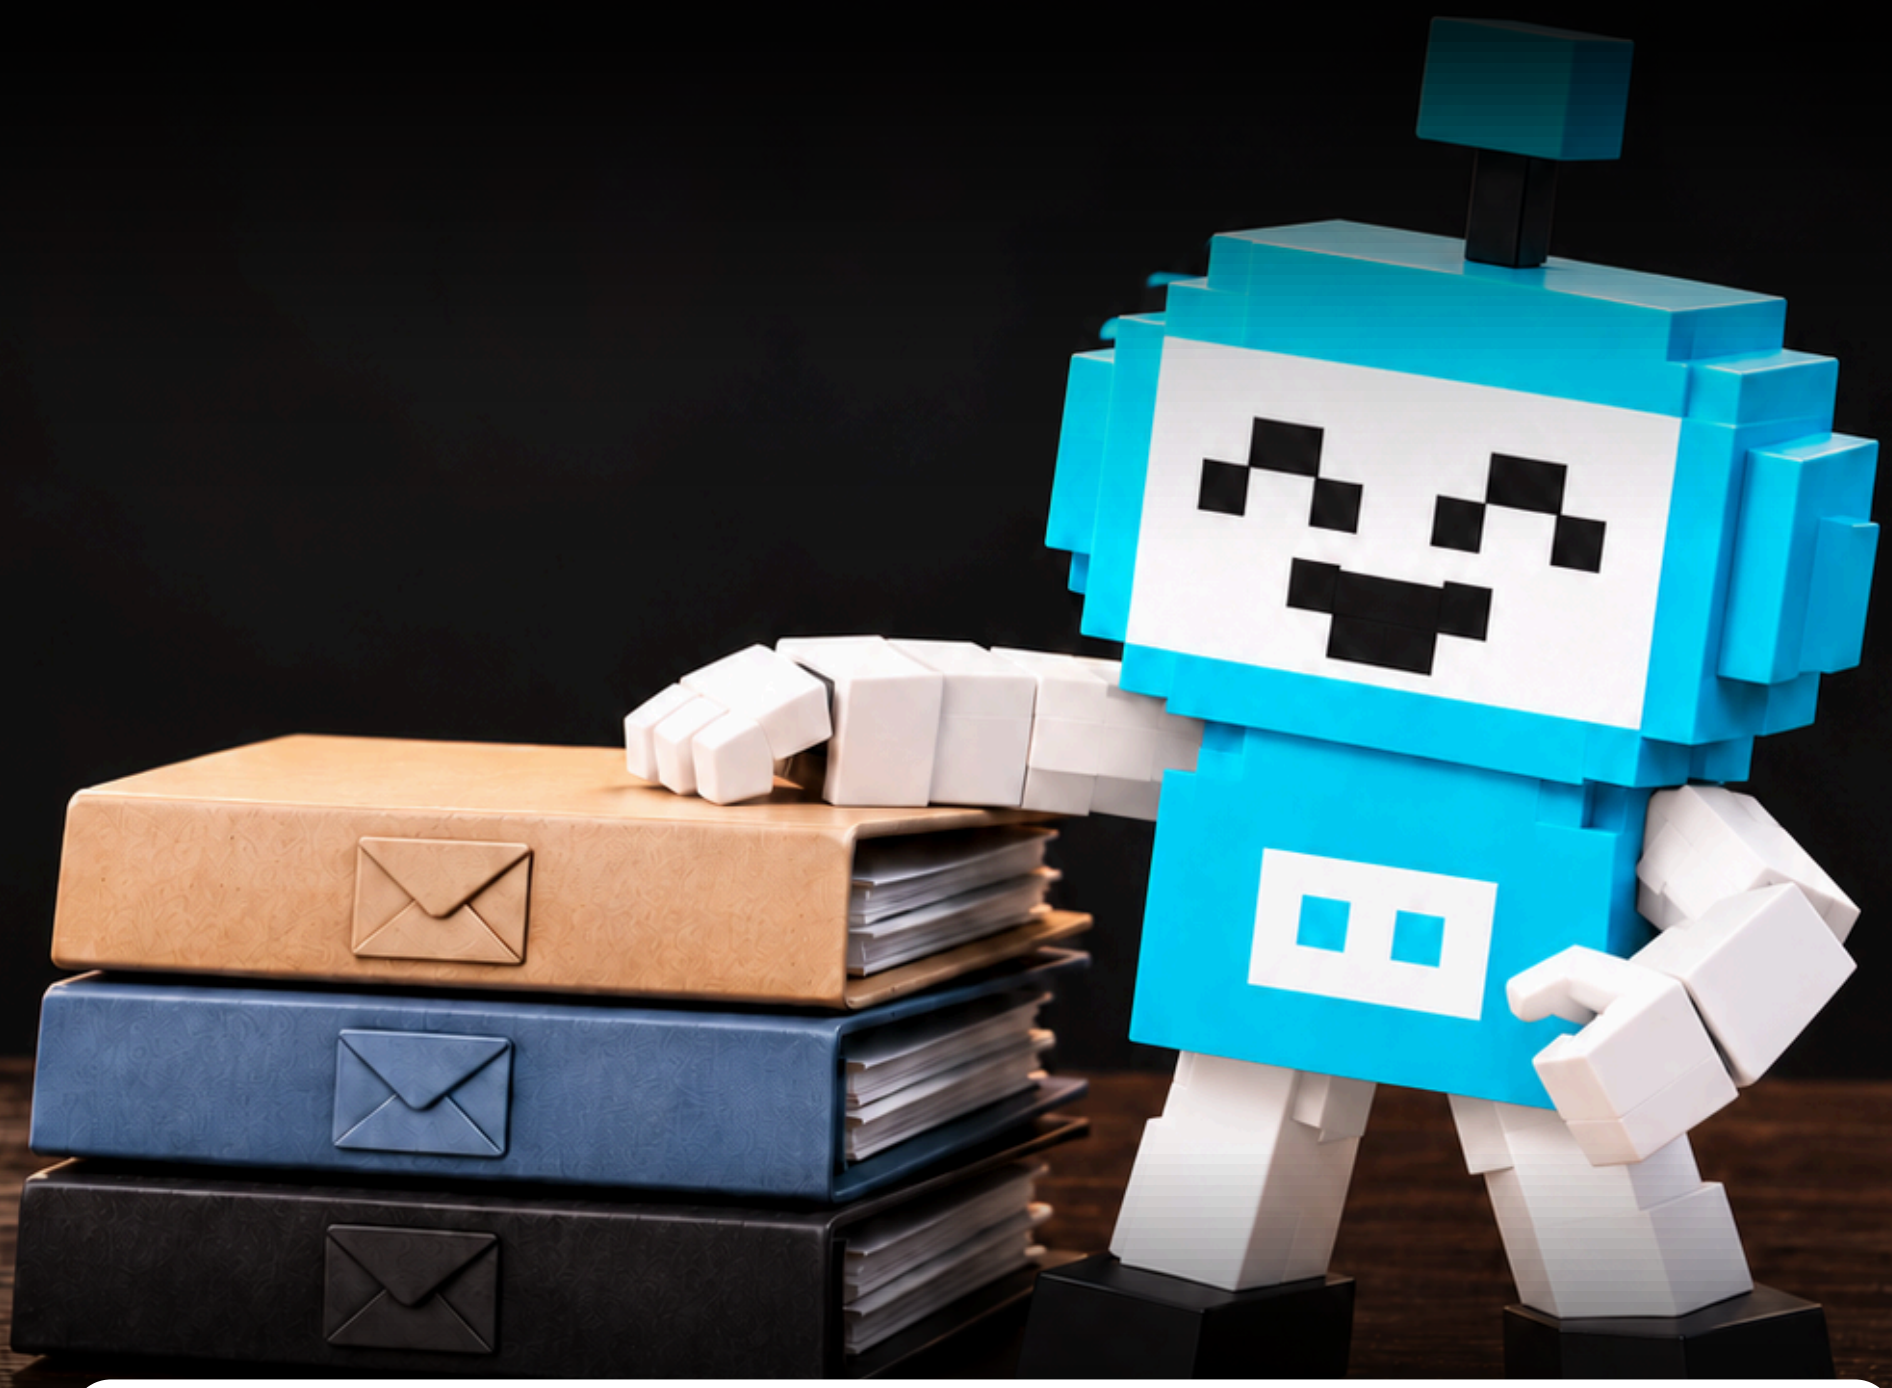

Get the delivery details,
including any supplier response.

- Give the supplier more time.
- Escalate or explore alternatives.

Your team has work to do.
Let ART do the chasing.

ART (A Realtime Tech) keeps supplier follow-ups
off your team's to-do list.

A REALTIME TECH

Put ART to work.
