Supplier said Tuesday.
It's Friday.

The promised date has passed.
Your stock and your team are still waiting.

One late delivery can put the whole pipeline on hold.

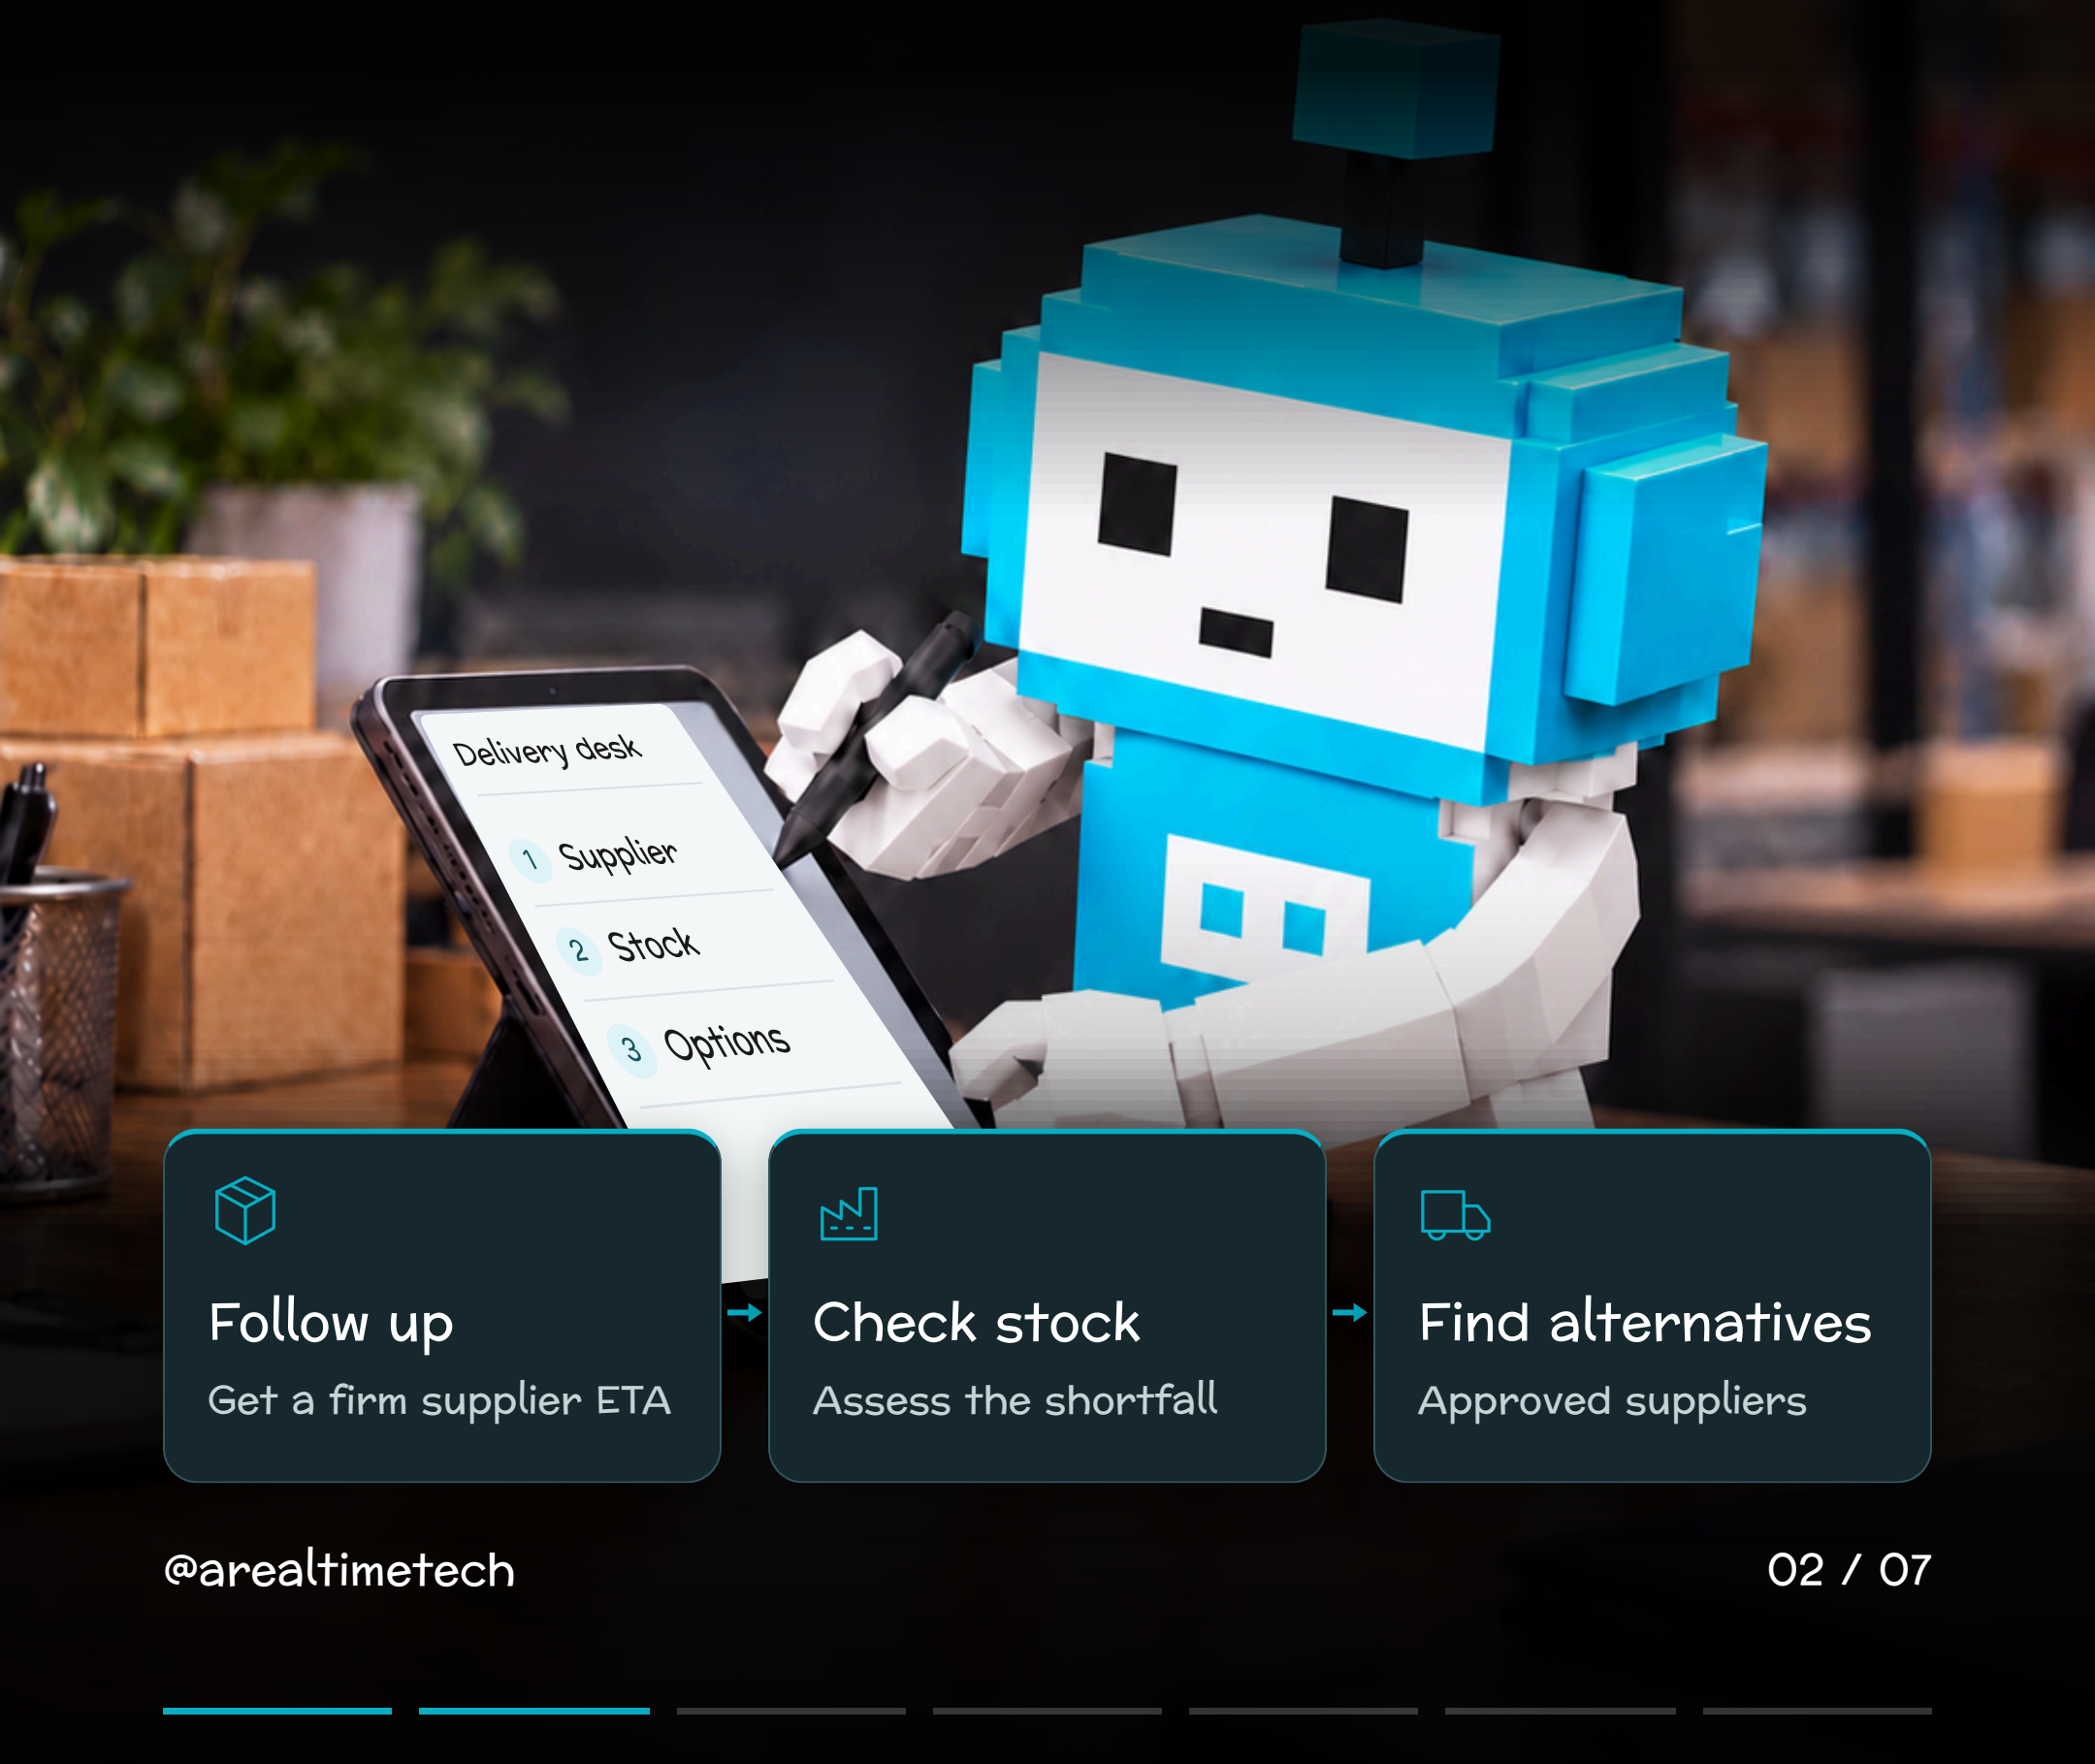

Material overdue → Production held → Dispatch at risk

Meet A REALTIME TECH

Governed automation
for everyday business operations.

A supplier delay shouldn't leave
your whole operation waiting.

Follow up
Get a firm supplier ETA

Check stock
Assess the shortfall

Find alternatives
Approved suppliers

The date is set.
ART stays on it.

From order confirmation to dispatch,
ART keeps asking for updates
and sends timely reminders.

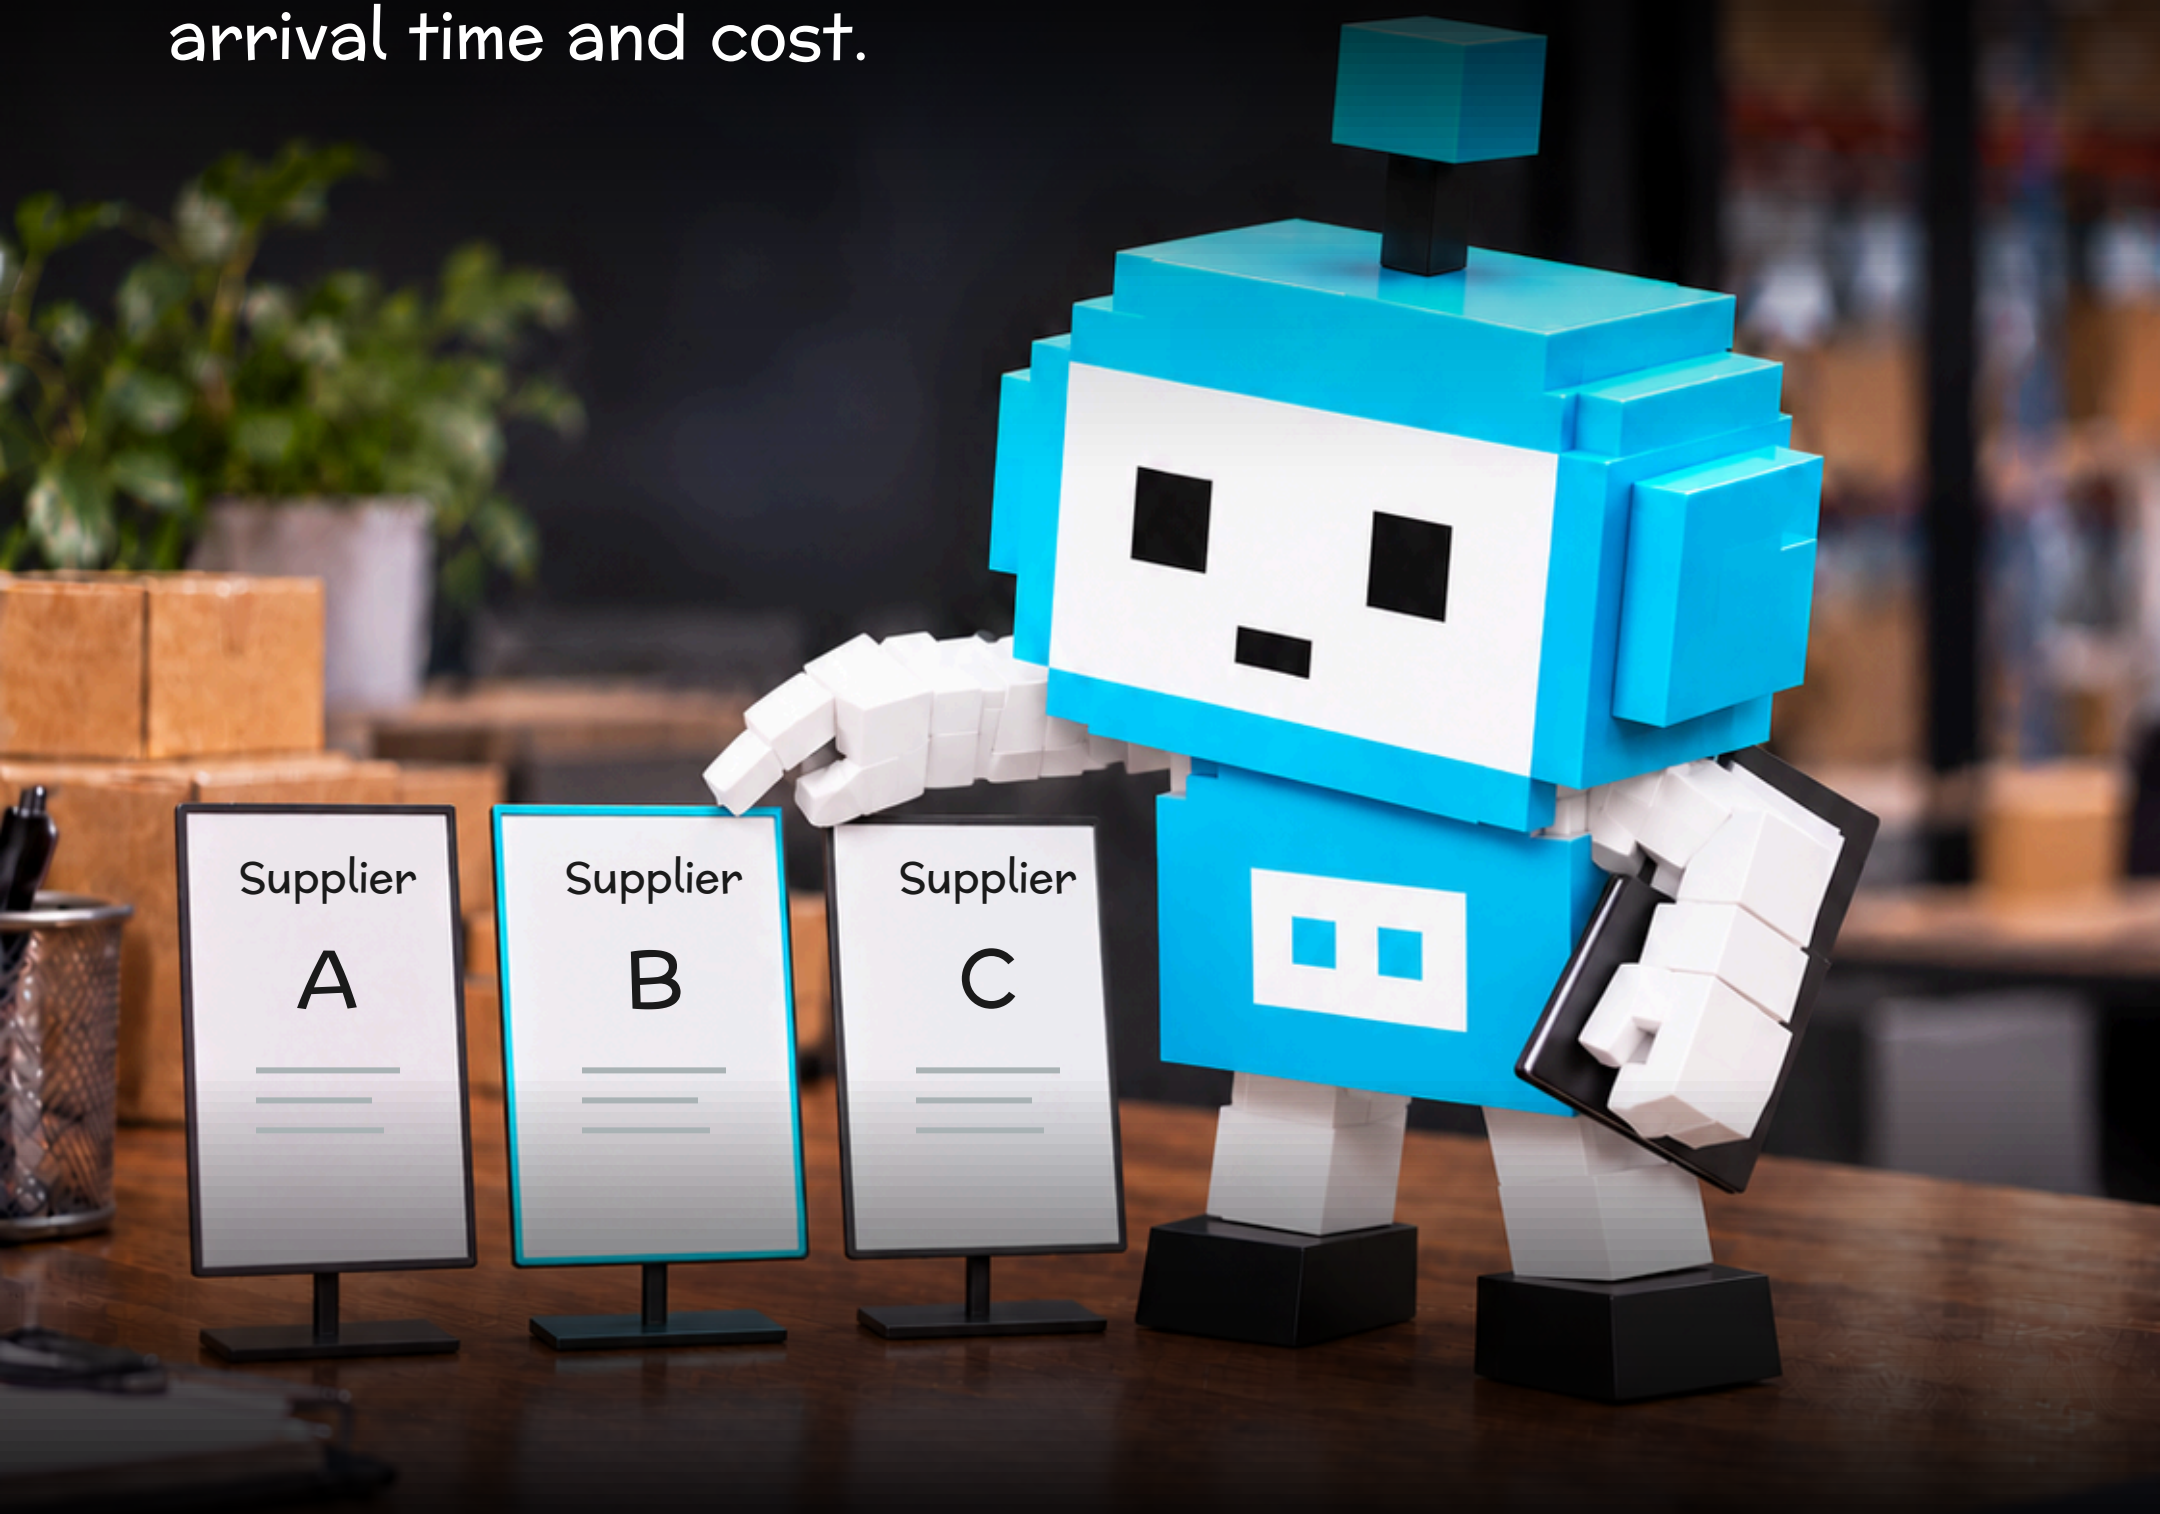

Will stock last
until the new delivery?

ART checks demand and incoming stock
to calculate the shortfall
and identify orders at risk.

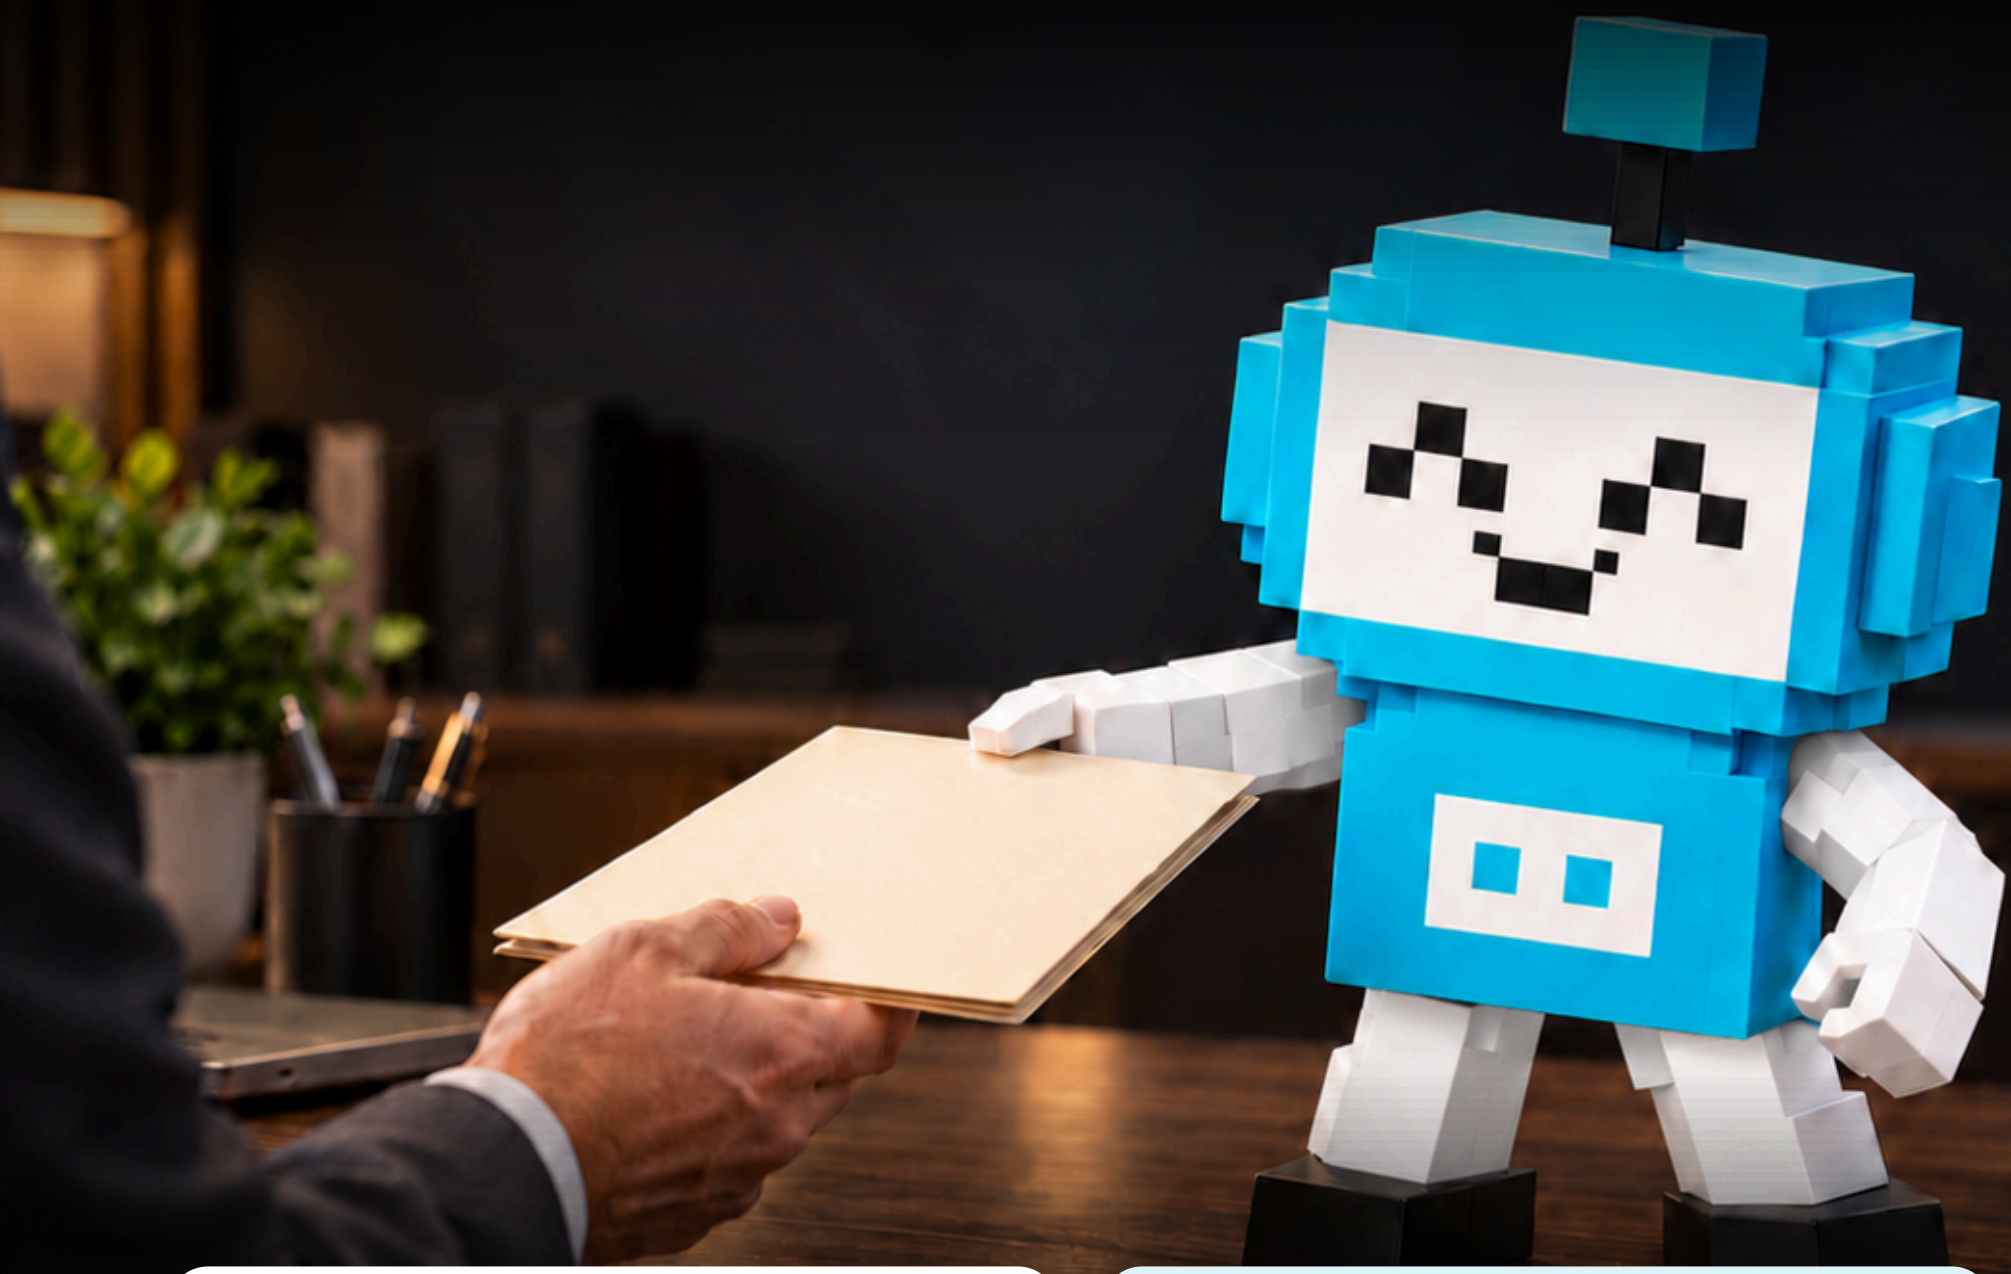

Your supplier can't meet the need?
ART looks for who can.

It checks approved alternatives
for the required quantity,
arrival time and cost.

Cover what's missing. Keep control of what changes.

ART accounts for the original delivery before arranging replacement stock.

Within your purchasing rules, ART proceeds.

Changes outside them come to you for approval.

A REALTIME TECH

Stop chasing delivery updates.

Put ART on the follow-through.

Let ART (A Realtime Tech)
track suppliers,
flag delivery risks and
coordinate the next move.

DM "DELIVERY" to discuss your supplier workflow.
