CATCH DELIVERY DELAYS BEFORE YOUR CUSTOMER DOES.

Your team already handles the unexpected. What if you heard first?

Delays start small.
Swipe to see where.

@arealtimetech

Delays happen.
Who hears first?

From port to destination, small slips can start in four places.

HERE'S WHERE ↓

1. Pickup
2. In transit
3. Arrival time
4. The update

@arealtimetech

1/4 • PICKUP

Pickup missed?

Nobody notices until the slot is gone.

What if it was flagged the moment it happened?

- Caught early
- Time to re-plan

@arealtimetech

2/4 · IN TRANSIT

Shipment gone quiet?

You find out when someone asks.

How about a nudge the moment it stalls?

- ✓ No silent stalls
- Details ready

@arealtimetech

→

3/4 · ARRIVAL TIME

Arrival time slipping?

One slow checkpoint, and the promise quietly moves.

Imagine knowing early enough to plan around it.

- ✓ Plans that adjust
- ✓ Promises kept

ARRIVAL

@arealtimetech

→

4/4 · THE UPDATE

Who tells the customer first?

News from anyone else makes a small delay feel big.

What if you heard first, and chose what they hear?

- ✓ You speak first
- • Trust intact

@arealtimetech

→

A REALTIME TECH

Your team already handles delays well. What if you always heard first?

That's where **ART (A Realtime Tech)** comes in. Aiotrix's Governed Automation Platform sits on top of the systems you already use and flags a slip the moment it starts. You decide who hears and what your customer is told.

Your customer hears it from you, first.

Let ART manage everything for you.

@arealtimetech

Delays still happen.
Surprises don’t.

- Missed pickups caught
- Stalled shipments flagged
- Arrival times you can plan around
- Customers who hear it from you

And a reputation that holds.

@arealtimetech

Who hears about a delay first?

Your team, or your customer?
Tell us below.

DM us to see how early you could know.

Save this for your next ops meeting.
