This invoice is due Friday.

The goods are here. So is the invoice.

Can ART (A Realtime Tech) help get it payment-ready in time?

Let's follow the workflow. →

First, the paperwork.

ART checks three records.
One connected story.

Purchase Order

Goods Receipt

Vendor Invoice

Wait. Two units short.

Ordered: 100. Received: 98.
One difference to resolve.

Ordered	Received	Invoiced
100 units	98 units	100 units

Which way next?

ART follows your rules.
The choice stays with your team.

A Pay the invoice anyway.

B Hold for authorised review.

A

B

The right eyes.
The full story.

ART brings the evidence.
Your team makes the call.

The numbers align.
Friday stays on track.

ART confirms the match.

Ready for payment approval.

Purchase Order
100 units

Goods Receipt
100 units

Revised Invoice
100 units

APPROVED

Friday arrives.
Ready, right on time.

The amount. The approvals.
The evidence.

Your finance team executes payment.

Your vendors count on the date.

Behind every due date is a relationship.

Fits your workflow.

Your approvals.
Your control.

Stronger vendor relationships.

Prepare with
ART (A Realtime Tech).
