More orders. Same team. Same system?

In the weeks before Diwali, cashew, sweets and gifting orders pile up fast. What works on a normal day starts to crack, and it usually cracks in the same four places.

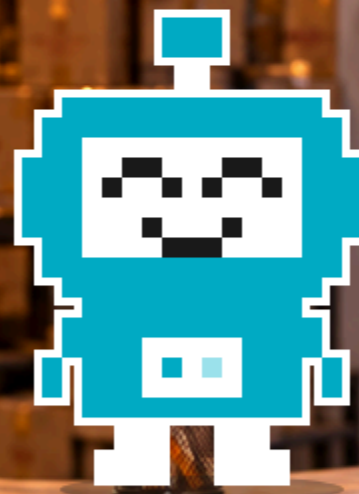

Here's where 

Orders buried in multiple places?

Orders come in by phone, chat and email, all at once. One gets lost in the scroll, and you only find out when the customer calls asking where it is.

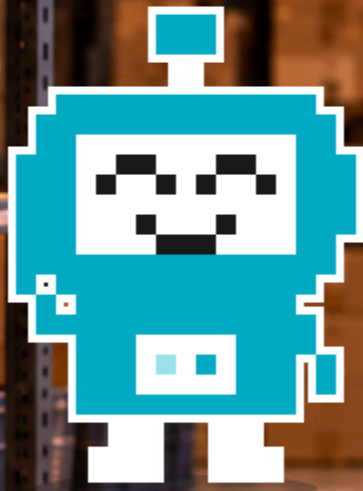

What if every order, from every channel, landed in one place, logged and tracked from the moment it came in?

✓ → No order missed. No festive sale lost.

Ran out of your best-seller mid-rush?

In peak season, stock moves faster than anyone can count it. By the time someone spots the empty shelf, the orders are already promised.

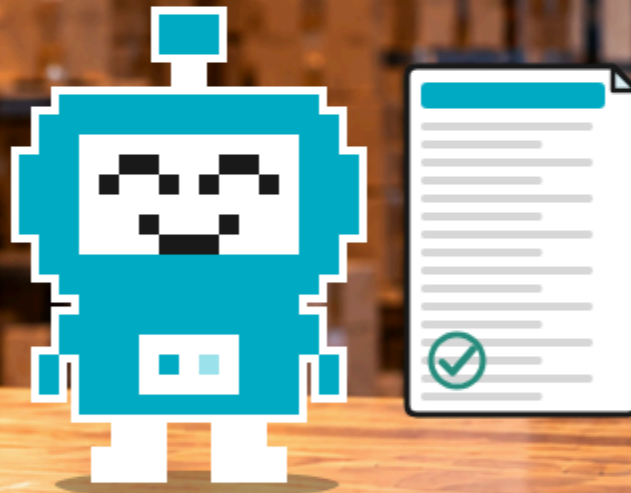

How about your stock being watched for you, with a reorder drafted before it runs low, waiting for your approval?

✓ → Stock that keeps up with demand. No sales turned away.

Invoices and e-way bills stacking up at the end of the day?

More orders mean more paperwork, typed in a hurry. One wrong detail can hold a consignment back right when your customer needs it most.

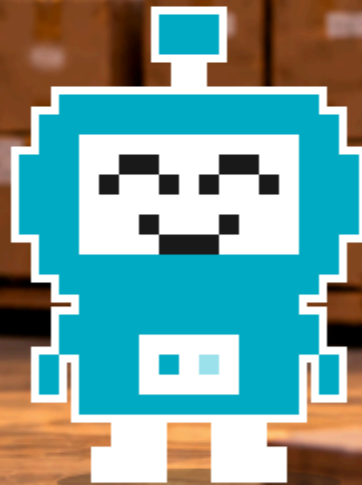

What if every document was read once and checked against the order, so mistakes were caught before the goods left?

✓ → Fewer errors. Goods that leave on time.

"Where's my order?" calls piling up?

When a delivery runs late, you usually hear about it from an unhappy customer. In festive season, that call can cost you the customer for the whole year.

Imagine delays flagged the moment they happen, and your customers updated automatically, before they have to ask.

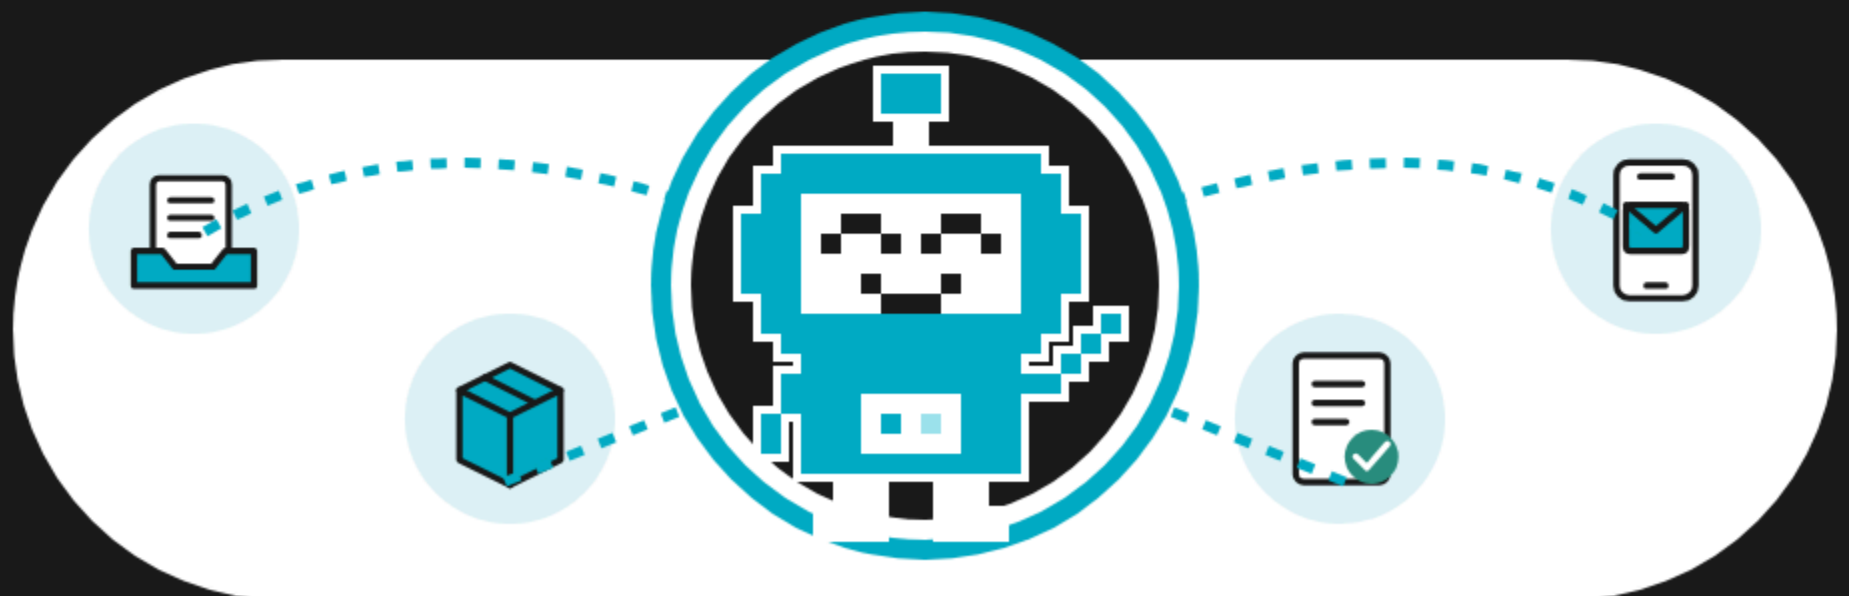

→ Fewer calls. Customers who come back next season.

Your business already runs the rush like clockwork. What if it took even less effort?

Every festive season, Mangaluru's businesses deliver. [ART \(A Realtime Tech\)](#), Aiotrix's Governed Automation Platform, helps you do it with even more ease: it sits on top of the systems you already use and keeps every order, shelf, invoice and delivery in step, in real time. You decide what it runs on its own and what comes to you first.

From our team in Mangaluru to yours: here's to your best festive season yet 🪔

This festive season, nothing slips.

✓ Every order captured

✓ Stock that keeps up

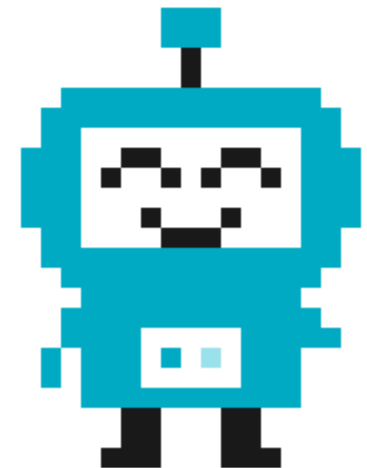

✓ Paperwork right the first time

✓ Customers kept in the loop

And a team that spends the rush
serving customers, not chasing work.

Diwali is only weeks away.

The best time to fix the rush is before it starts.

DM us to see how ART could fit your business this season.

Save this and share it with whoever runs your dispatch.
