7 CALLS BEHIND ONE CONTAINER.

Goods ready? Documents correct?
Truck confirmed?

One shipment. A whole day connecting the dots.

Meet A REALTIME TECH

Governed automation
for everyday business operations.

Your team shouldn't have to hold the shipment together through calls.

ART connects updates, checks what's missing
and coordinates the next step.

1 / 4 · READINESS

'Ready' needs more than a supplier's word.

Goods packed. Documents complete.
Pickup arranged.

ART checks what's confirmed—and follows up on what still stands between 'ready' and moving.

The details changed.
Has the plan caught up?

A revised packing list can affect
the load and pickup arrangements.

ART checks the change against shipment details and flags what needs correcting.

3 / 4 · PICKUP

Pickup moved. The impact doesn't stop there.

Warehouse timing. Transport plans. Shipment cutoffs.

ART connects the affected steps and coordinates revised arrangements.

@arealtimetech

A message sent isn't a job done.

'Please confirm' can't be the last step.

ART keeps track of outstanding confirmations, follows up and flags milestones at risk.

When the plan needs a decision, you get the whole picture.

- What changed.
- What it affects.
- What options are available.

Routine coordination follows your rules.
Extra costs and exceptions come to the right person.

A REALTIME TECH

Move the container.
Lose the constant chasing.

Let ART (A Realtime Tech)
connect the follow-through.

DM "CONTAINER"

to explore your shipment workflow.
