ART (A Realtime Tech)

Your shelves called. ART's already on it.

Low stock spotted. Reorder handled.
One less thing for your team to chase.

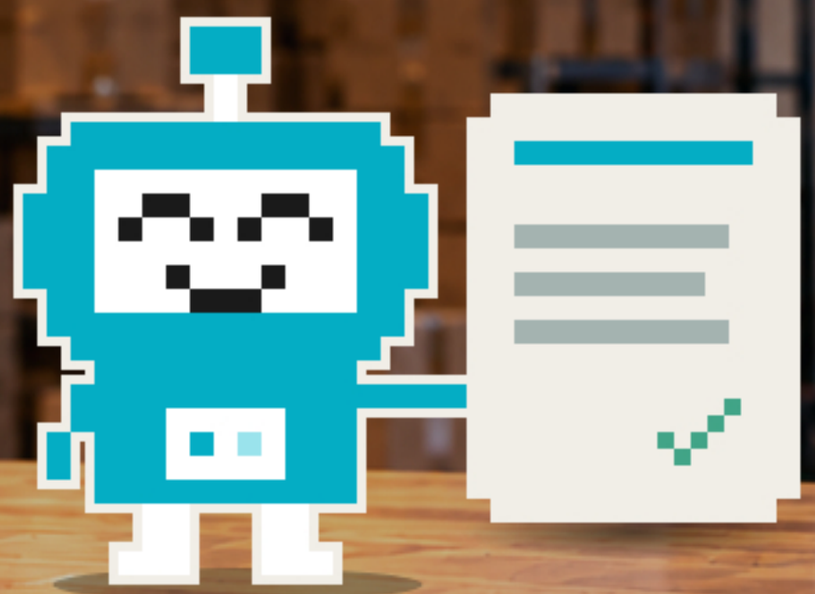

Stock updated

ART

Low stock. Next order, handled.

ART reorders within your limits.
Set the stock rules once. ART handles the next step.

ART

Stop chasing stock.

Manual checks. Late orders.
Avoidable shortages.
By the time someone notices, the shelf can already be empty.

ART spots what's running low.

Your stock rules trigger the next step.

When stock hits your reorder point, ART starts the check.

Check incoming next

ART

Check first. Reorder what's needed.

ART checks stock and incoming orders.
What's already on the way helps shape the next order.

Incoming counted. Reorder only the gap.

Your limit.
Two clear paths.

Example approval limit: ₹10,000

Within your amount limit

₹6,000

ART places the order.

Above your amount limit

₹15,000

ART sends it for approval.

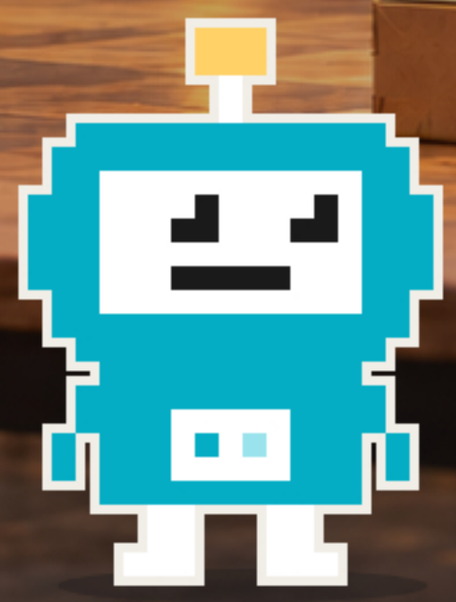

ART

An exception needs your call.

Review. Adjust. Approve or hold.
See the request and decide what happens next.

Your decision

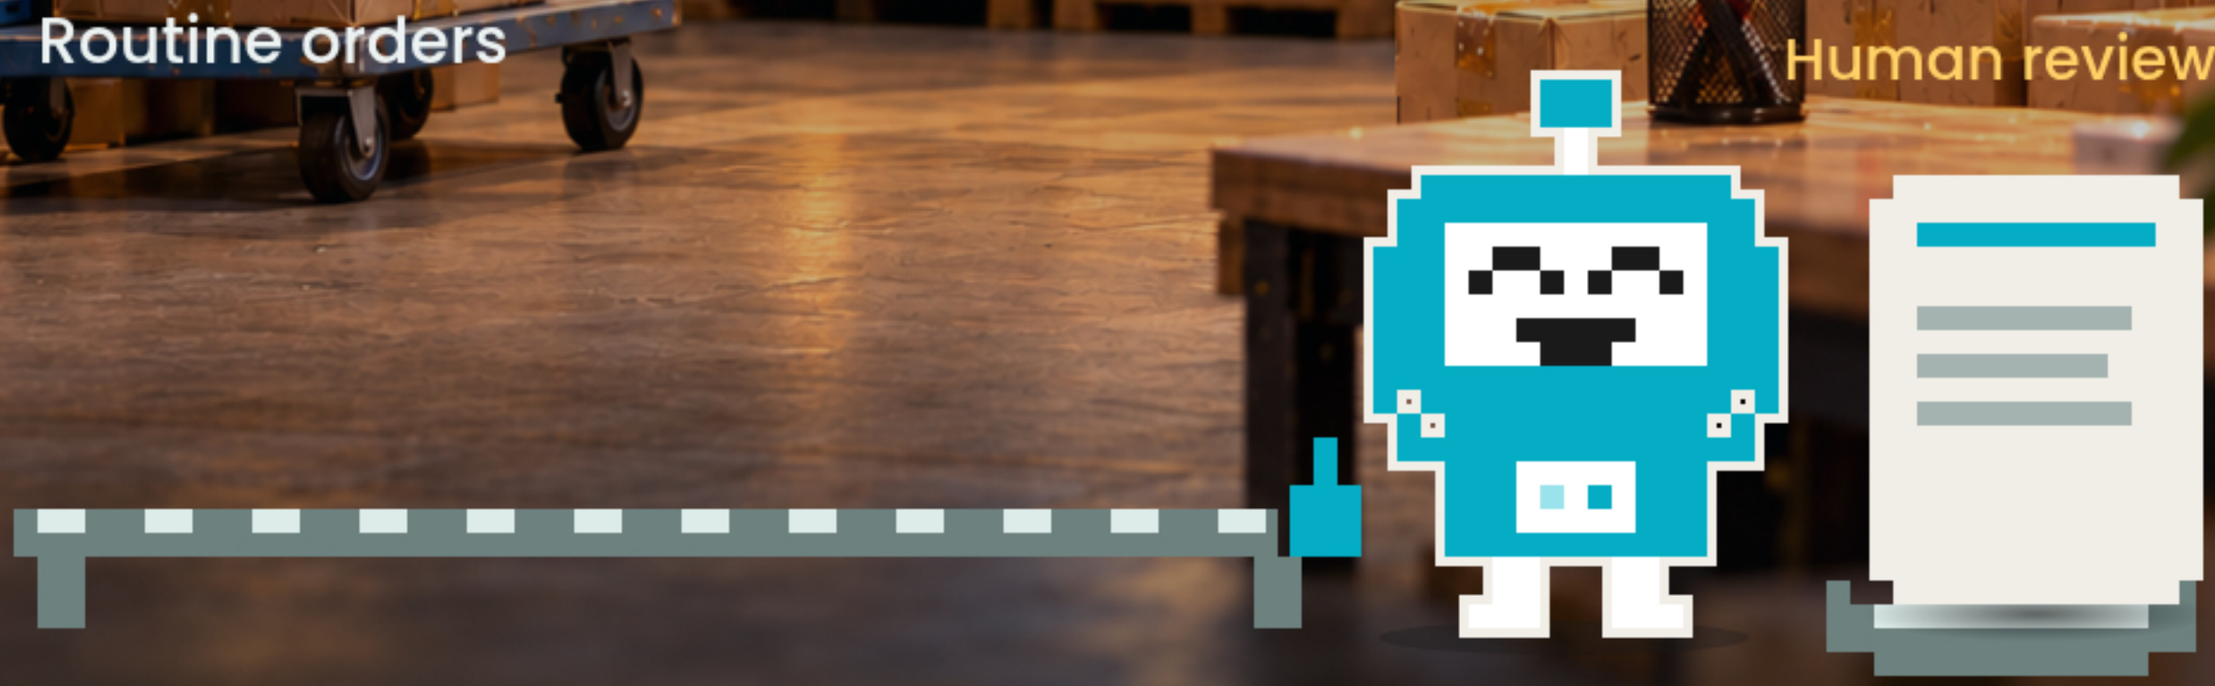

Awaiting your decision

Routine orders move. Exceptions reach you.

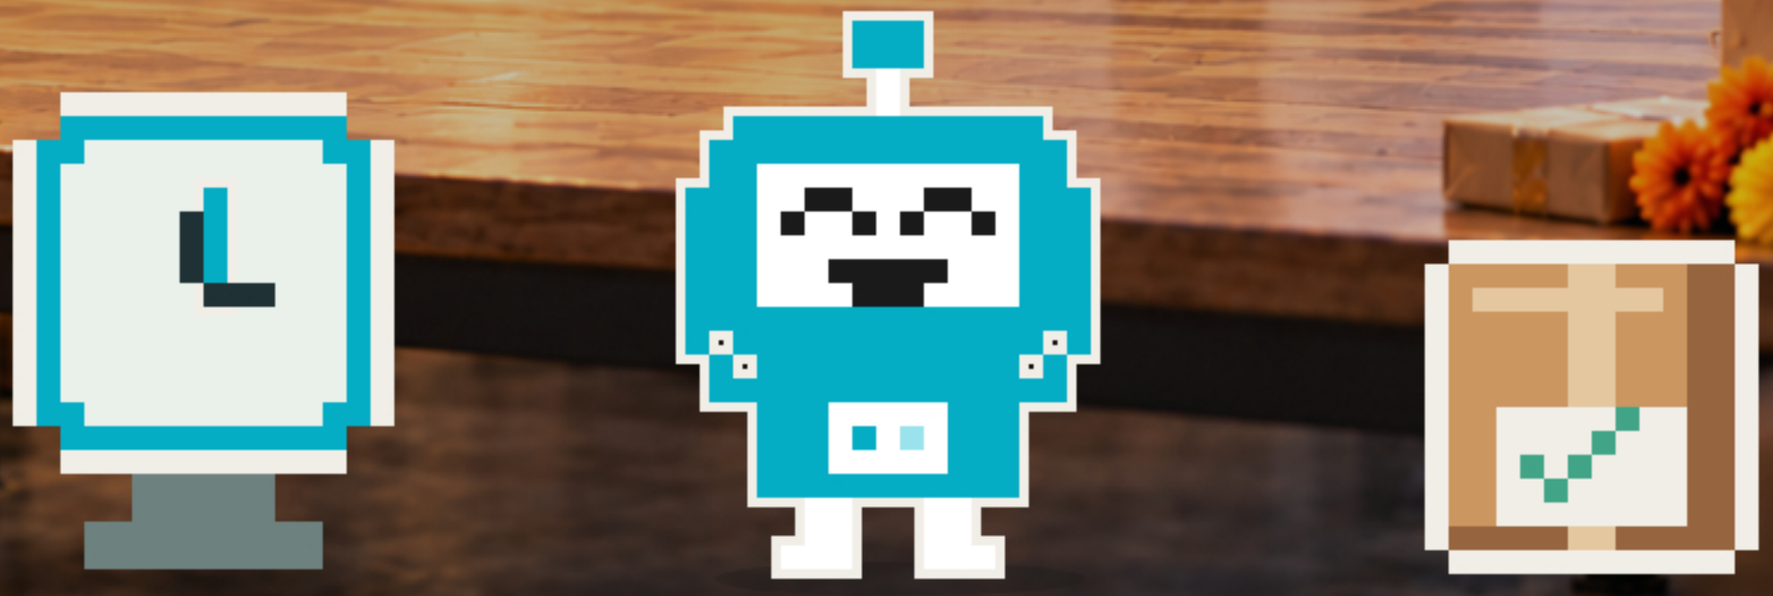

Less chasing. Control where it counts.

Everyday replenishment keeps moving within your rules.

Stock handled.
Time handed back.

Let ART handle replenishment.
Put your team's time into what's next.

Put ART to work.
